### **Metrofuser Offers CompTIA PDI+ Exam Prep Online**

CompTIA Authorized and OEM supported Certification Training available online

Laser printer parts manufacturer Metrofuser ([www.metrofuser.com](http://www.metrofuser.com)) announced that it is offering CompTIA PDI+™ Certification Training. The certification is a vendor neutral credential that certifies that an individual has the required knowledge and skills necessary to understand the principal operations of digital print and document imaging devices. These devices include printers, copiers, scanners, multi-functional devices (MFDs) and fax machines. CompTIA PDI+™ serves as a solid foundation for entry into a career involving the service and support of printing and document imaging devices. It also provides a stepping stone for Original Equipment Manufacturer (OEM) training for authorization on specific devices.

The service and support of printing and document imaging devices requires qualified technicians. CompTIA Printing and Document Imaging (PDI+) certifies a technician's ability to provide basic support for printers, copiers, scanners and multi-function devices regardless of the manufacturer. CompTIA PDI+ validates core knowledge of basic electromechanical components and tools, print engine and scan processes and components, color theory, connectivity/networking, professionalism and communication, and safety and environment.

#### **Why become certified?**

Simply put, a technician that becomes PDI+™ certified has verified their professional ability relating to installation and support of network attached [digital] office equipment. This proof shows employers and clients that you possess the knowledge needed to service equipment right –the first time! Whether you are an entry-level or experienced technician, support printing and document imaging devices as only part of your job or are interested in expanding your credentials, CompTIA PDI+ offers proof of your skills.

#### **CompTIA PDI+ Validates Your Ability To:**

- Resolve most printing and scanning problems
- Perform basic installation, repairs and maintenance
- Provide an adequate level of communication

#### **About The Course**

The training is available as an e-learning web-based self study course. These materials are "CompTIA Authorized Quality Curriculum" (CAQC), which certifies that the training content maps to the actual exam.

This online training experience is highly interactive and lots of FUN; loaded with engaging content in the form of full motion video, narrations, animations, graphics and sample exams that are designed to hold your attention. The use of state-of-the-art technology keeps the training interesting! We have eliminated the "boring" aspects of online training, you know, those plain PowerPoint bullets or monotonous talking heads that can put you to sleep!! There are questions (with explanations) throughout the training, along with multiple sample exams that assure your understanding. You can log in when it is convenient, navigate directly to any topic, and pick-up right where you left off when returning. This training provides the fundamentals needed for a new-comer to the industry and is highly sufficient for the industry expert looking to get certified. The left hand navigation bar will allow you to skip any topic that you may not need to cover.

CompTIA PDI+ is supported by industry leaders such as Brother, Canon, HP, Konica Minolta, Lexmark, Pitney Bowes, Ricoh, Sharp and Xerox. It is a solid foundation for entry into a career involving the service and support of printing and document imaging devices and also provides a stepping-stone towards Original Equipment Manufacturer (OEM) training for authorization on specific devices.
